## **Slack Integration**

Custom Integrations Why Slack Integrations from LightSpeed PM? Integrating Slack into Foglight without our custom integration services would require

- Custom Event Driven Rule
- Command Invocation
- Extensive Groovy Scripting for more control over sent events and other important metrics
- Defining Slack Fields in Foglight

# Simplify Slack Integration With LightSpeed PM's Custom Cartridge

Advanced Rich UI for All Functionalities Customizable Command Line Invocation Support

#### Customizable REST Invocation Support

- Create/Update tickets
- Ability to export data
- Flexible parameter definitions
  - Auto Annotate Alarms with returned information

Remote Administration of solution across servers Decision Engine for total / precise control • 20 levels of granularity • Severity Level control

#### Slack Integration Highlights

Pattern Editor to easily access many of the information related to the alarm

No Groovy required

- Access to dozens of fields to easily provide values to parameters
- A dozen common operators available to easily avoid any coding

#### Use of Groovy scripts for power users

Use of Groovy scripting with complete injected flow context
Ability to reject/delay ticket generation

Persisted Queue so no events are lost

- Guaranteed delivery
- Keep history for rejected, failed and successful operations for total control
- Pause or delay control
- Consumer Thread settings/control as to manage concurrency and volume.

#### Slack Integration Alarming Features

#### **Alarm Transition Support**

- Can be turned ON or OFF
- Update tickets when alarm is transitioning from one severity to another.
- Can be either to higher severity only or any transition
- Close ticket only when the last alarm in the transition has been cleared

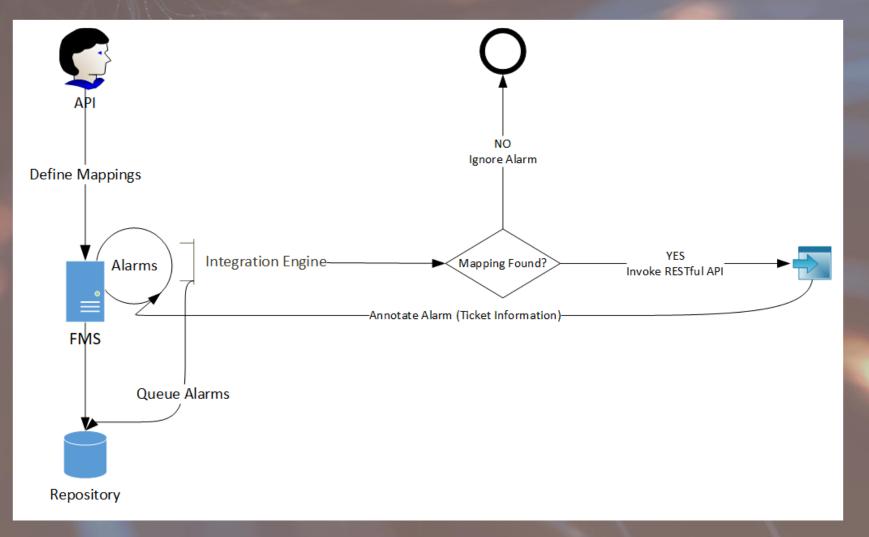

#### Auto Acknowledge Alarms

### Slack Integration – RESTful API Flow

#### Slack Integration – **Decision Engine** A rich UI within the solution presents the various mappings produced by the decision engine

|               | Se       | ervice | Host | Agent Type | Agent | Topology Object | Rule |  |
